DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-27, drawn to a detection system.

Group II, claim(s) 28-37, drawn to a cell culture method.

Group III, claim(s) 38-47, drawn to cell selection method.

Group IV, claim(s) 48-55, drawn to a culture selection method.

Group V, claim(s) 56-58 and 67-73, drawn to a system for detecting more than one target substance.

Group VI, claim(s) 59-63, drawn to inline detection system.

Group VII, claim(s) 64-66, drawn to scaling agent detection method.

Group VIII, claim(s) 74-80, drawn to a pathogen detection system.

Group IX, claim(s) 81-82, drawn to a piezoelectric array.

2. The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. The piezoelectric substrate/electrode pair feature required of the system of Group I is not required of the systems and methods of Groups II-IX.

4. The modifying culture conditions feature required of the method of Group II is not required of the systems and methods of Group I and Groups III-IX.
5. The cell selecting method feature required of the method of Group III is not required of the systems and methods of Groups I and II and Groups IV-IX.
6. The culture selecting method feature required of the method of Group IV is not required of the systems and methods of Groups I-III and Groups V-IX.
7. The first and second binding agents required of the system of Group V is not required of the systems and methods of Groups I-IV and VI-IX.
8. The scaling binding agent required of the system of Group VI is not required of the systems and methods of Groups I-V and Groups VII-IX.
9. The frequency change step required of the method of Group VII is not required of the systems and methods of Groups I-VI and Groups VIII-IX.
10. The pathogen binding agent required of the system of Group VIII is not required of the systems and methods of Groups I-VII and Group IX.
11. The piezoelectric array required of the system of Group IX is not required of the systems and methods of Groups I-VIII.
12. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

13. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

14. Any inquiry concerning this communication or earlier communications from the examiner should be directed to WILLIAM H. BEISNER whose telephone number is (571)272-
